

Glaciation

Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

3. A valley, either with or without a river or stream, that was created by glacial melt water.
6. A term which describes a moraine that is formed where a glacier reaches its farthest extent before beginning to retreat.
7. Number of times that glaciers covered large areas of North America during the last million years.
8. U-shaped valley that was carved by a glacier and was then flooded.
9. A long depression in the surface of the land that usually contains a river.

DOWN

1. Material carried directly by a glacier.
2. Deposits along the side of a glacier are called _____ moraines.
4. The debris carried and deposited by glaciers.
5. A jagged, knifelike ridge separating two cirques on a mountain.
6. A lake formed at the bottom of an alpine glacier.
