

Glaciation

Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

2. Ridges built up by deposits carried by streams flowing under glacial ice.
6. This type of glacier is also known as valley or mountain.
7. Oval-shaped hill that has been "plastered" by a glacier.
8. The type of glacier that last covered large areas of North America.
10. The condition of being covered with glaciers or masses of ice.

DOWN

1. A jagged, knifelike ridge separating two cirques on a mountain.
3. Type of moraine found along the center of a glacier, formed when two glaciers join, their lateral moraines meeting to form the central band of debris.
4. A valley, either with or without a river or stream, that was created by glacial melt water.
5. A lake formed at the bottom of an alpine glacier.
9. Material carried directly by a glacier.
