

# Glaciation

Using the Across and Down clues, write the correct words in the numbered grid below.

## ACROSS

2. Number of times that glaciers covered large areas of North America during the last million years.
5. An area where a continental glacier may still be seen.
8. The debris carried and deposited by glaciers.
9. Material from a terminal moraine, washed down stream, may be deposited as this over a wide area.
10. The type of glacier that last covered large areas of North America.

## DOWN

1. They might be terminal, lateral, or recessional.
3. A jagged, knifelike ridge separating two cirques on a mountain.
4. A long depression in the surface of the land that usually contains a river.
6. A deep, amphitheatre-shaped basin found on a glaciated mountain.
7. Oval-shaped hill that has been "plastered" by a glacier.
