# Weather

Using the Across and Down clues, write the correct words in the numbered grid below.

## ACROSS

- Someone who studies the weather.
- The process by which water in plants is transferred as water vapor to the atmosphere.
- Type of cloud that will bring a long steady rain.
- An instrument used to measure atmospheric pressure.
- An arc of colored light in the sky caused by refraction of the sun's rays by rain.

## DOWN

- The degree of hotness or coldness.
- Water that has condensed on a cool surface overnight from water vapor in the air.
- Frozen precipitation in the form of white or translucent ice crystals.
- Any wind that changes direction with the seasons.
- Type of cloud that typically has a flat base with a piled-up, puffy top.
