1. The largest object in the solar system.
2. The distance traveled by light in a year.
3. A bowl-shaped depression formed by the impact of a meteoroid.
4. Named after the Roman god of the sea.
5. A medium-sized rocky object orbiting the Sun.

6. Technical instrument used to see distant objects as stars.
7. The closest planet to the Sun and the eighth largest.
8. A star that explodes, temporarily increasing its brightness 100000 times or more.
9. A small body that circles the Sun with a highly elliptical orbit.
10. The first person to use a telescope to study the stars.
