- Mountains formed from the build-up of volcanic lava often take this shape.
- Waves from an earthquake are known as these.
- Molten rock that erupts from volcanoes.
- Molten rock that is found beneath the earth's surface.
- A volcano that has not erupted recently, but may do so in the future.

- Used to measure the strength of earthquakes.
- A vent at the earth's surface through which magma and gases erupt.
- The large, thin, plates that move relative to one another on the outer surface of the Earth.
- The area of the earth's surface that is directly above the origin of an earthquake.
- A crack in the earth's surface along which movement takes place.
