1. A vortex of air rising into a cloud.
2. Someone who studies the weather.
3. Type of cloud that typically has a flat base with a piled-up, puffy top.
4. Frozen rain droplets created by the up drafts of convective thunderstorms.
5. Visible electrical releases created by thunderstorms.

6. The air surrounding and bound to the earth.
7. Droplets of water vapor suspended in the air near the ground.
8. Clouds that are uniform gray clouds that often cover the entire sky.
9. Any wind that changes direction with the seasons.
10. Type of cloud that will bring a long steady rain.
