1. Water that has condensed on a cool surface overnight from water vapor in the air.
2. An arc of colored light in the sky caused by refraction of the sun's rays by rain.
3. Type of cloud that will bring a long steady rain.
4. An instrument used to measure atmospheric pressure.
5. Frozen precipitation in the form of white or translucent ice crystals.

6. Clouds that are uniform gray clouds that often cover the entire sky.
7. The air surrounding and bound to the earth.
8. Frozen rain droplets created by the up drafts of convective thunderstorms.
9. Usually seen on clear winter nights in an array of shapes and colors near the earth's magnetic poles.
10. Any wind that changes direction with the seasons.
