Y	L	A	U	R	O	R	A	B	O	R	E	A	L	I	S

1. Usually seen on clear winter nights in an array of shapes and colors near the earth's magnetic poles.
2. The physical process by which vapor becomes liquid or solid; the opposite of evaporation.
3. Type of cloud that typically has a flat base with a piled-up, puffy top.
4. The air surrounding and bound to the earth.
5. Is a measure of the amount of water vapor content of the air.

6. Droplets of water vapor suspended in the air near the ground.
7. Abnormal dry weather for a specific area that is sufficiently prolonged.
8. Tropical cyclones that blow in a large spiral around a relatively calm center eye.
9. The process by which water in plants is transferred as water vapor to the atmosphere.
10. An instrument used to measure atmospheric pressure.

ATMOSPHERE
DROUGHT
