

# Glaciation

Using the Across and Down clues, write the correct words in the numbered grid below.

## ACROSS

2. A term which describes a moraine that is formed where a glacier reaches its farthest extent before beginning to retreat.
6. The saddle-shaped gaps between horns on a mountain.
7. The debris carried and deposited by glaciers.
8. Material from a terminal moraine, washed down stream, may be deposited as this over a wide area.
9. A long depression in the surface of the land that usually contains a river.

## DOWN

1. A valley, either with or without a river or stream, that was created by glacial melt water.
2. Material carried directly by a glacier.
3. They might be terminal, lateral, or recessional.
4. Deposits along the side of a glacier are called \_\_\_\_\_ moraines.
5. Type of lake formed when huge blocks of ice were buried in glacial till, melted, and formed a depression that filled with water.
